

PhytoMatrix® tablets

The Real Food Technology Solution for Essential Nutritional Support

PhytoMatrix is the first food supplement to provide naturally sourced vitamins, plant-sourced minerals and phytonutrients at nutritionally effective amounts.

Know the Source of Your Vitamin/Mineral Product

The human body is designed to best utilize nutrients from real food sources.

Standardised levels of vitamins can be obtained from:

Synthetically made chemical isolates from petroleum

Natural sources

OR

Standardised levels of minerals can be obtained from:

Inorganic or chelated mineral salts

Hydroponically grown Indian mustard plants

OR

Patent Filed 2007

Real Food-sourced Nutrients in PhytoMatrix

- **Vitamin A** – derived from [plant-based] mixed carotenoids – supports healthy immune function and vision.
- **Vitamin C** – derived from tropical acerola cherries, with 30 times more vitamin C per gram than an orange – provides enhanced antioxidant support.
- **10 additional essential vitamins** – including a complete B-vitamin complex from natural yeast sources – provides a great source of energy.
- **13 minerals** – sourced from hydroponically grown Indian Mustard plant – provides standardised, optimum levels of food-based minerals that your body is designed to recognize and use efficiently.
- **Powerful phytonutrients** – derived from broccoli, cranberry juice, grape extract and aloe vera – helps the body's absorption and use of vitamins and minerals.

The Remarkable Mustard Seed

Patented hydroponic growing technique provides [green] food-sourced minerals at nutritionally effective levels.

MAIL ONLINE London: Friday, May 6, 2011

An extract made from the Indian Mustard plant is being hailed as the most important food supplement of the future. For centuries this little known member of the broccoli family was known by peasants in rural India as the "plant of long life." Recent research into Indian Mustard provided scientists with two remarkable findings. First, the plant contains a powerful cocktail of nutrients including vitamins, antioxidants and minerals with three times more calcium, potassium and iron than is found in ordinary green-leafed vegetables. Second, it has a unique ability to hyper-absorb minerals. Using state-of-the-art bio-technology, the Indian Mustard plants are being grown hydroponically in water infused with high levels of minerals. Plants naturally convert minerals into phytominerals, a bio-available form, which the body can easily use.

Does your vitamin have a big purpose?

Over 5 million children under the age of 5 die every year from the devastating effects of malnutrition. Lack of proper nutrition in the early developmental years is to blame for issues such as stunted growth, retarded brain development and poor health in the lives of 55 million children worldwide. Doctors Without Borders says that "Feeding programs are not enough; these children need critical nutrients."

Would you switch your vitamin if...

- It meant you and your family could have a vitamin/mineral supplement made from REAL FOOD sources and not from synthetic or inorganic sources?
- It could help save a child from the devastating impact of malnutrition?
- It came with a 90-day satisfaction guarantee?

(Full details can be found in the Policies and Procedures document.)

Former President of Mexico, Vicente Fox and Mannatech founder, Sam Caster

"We have found PhytoBlend™ powder to be the best strategy for helping to fight malnutrition. The impact of this nutrient-rich powder was immediate and dramatic in some of our country's most vulnerable children."

– *President Vicente Fox*

Give for Real Donation Through Consumption Plan

For each qualifying product based on Real Food Technology solutions placed on a monthly Automatic Order, Mannatech makes a donation to provide a child in need with PhytoBlend powder, our PhytoMatrix-based vitamin/mineral product for aiding in the fight against global malnutrition.

- Five million children under the age of five die each year from malnutrition.
- Our goal is to educate and inspire 3.3% (5 million) of those consumers to switch from synthetically sourced vitamins and mineral products to our real food-sourced products.

PhytoBlend powder can help turn any meal into the most nourishing meal a child will eat!

For distribution in the EU only.
